

What is claimed is:

1. A composition comprising a therapeutic agent biocompatibly coupled to a carrier similar in size to a red blood cell.

5

2. The composition of claim 1 wherein the carrier is a red blood cell.

3. The composition of claim 1 wherein the therapeutic agent is an anti-thrombotic agent.

10

4. A method for selectively dissolving nascent intravascular blood clots in a subject while sparing pre-existing hemostatic clots in the subject comprising administering to the subject the composition of claim 3.

15

5. A thromboprophylactic agent comprising the composition of claim 3 and a pharmaceutically acceptable vehicle.

20

6. A method for preventing formation of nascent intravascular blood clots in a subject comprising administering to the subject the thromboprophylactic agent of claim 5.
